Prepare the dive

Research > choose a region > deploy your six specialists.

1 Start research

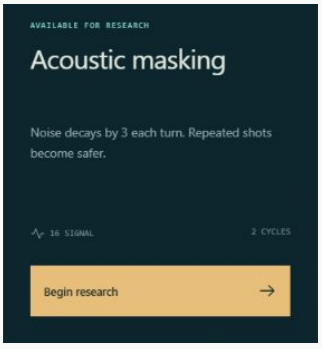

In Research, begin **Acoustic masking:** 16 Signal, 2 cycles. Benefit starts after completion.

2 North Atlantic first

Two valves; no escort or demolition timer. Reward: **34 Material + 16 Signal.**

3 Begin operation

Click **Prepare deployment**, check six ready operators, then **Begin operation**.

RESEARCH CLOSE-UP

Watch the regional flag

Indian Ocean counters a threat due in **3 cycles**. Later, urgent breaches and countdowns can outweigh this starter choice.

MATERIAL

Equipment / recruits

SIGNAL

Research

STABILITY

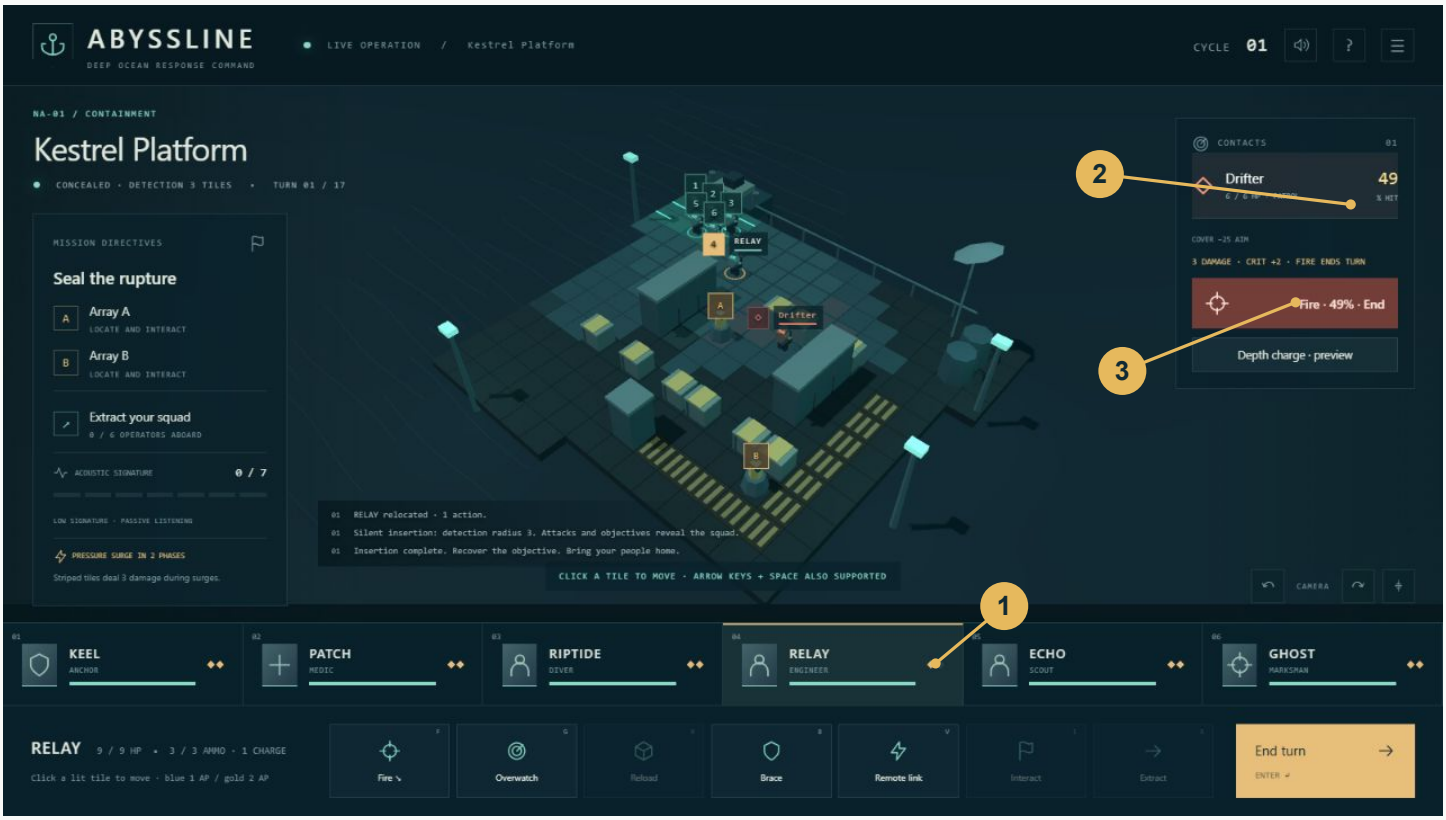

Keep above zero

YOUR SIX SPECIALISTS

Anchor	Medic	Diver	Engineer	Scout	Marksman
KEEL	PATCH	RIPTIDE	RELAY	ECHO	GHOST
Suppress	Heal	Move farther	Link valves	Reveal	Aim + damage

Move, then act

Select with the roster or keys 1-6. Every operator starts with 2 AP.

1 Read the AP diamonds

Click a lit tile to move:
blue = 1 AP / gold = 2 AP.

2 Inspect the target

Click a hostile. Check hit chance, cover and ammunition. **49% can miss.**

3 Fire ends this turn

Move before firing. Then select another operator; finish the squad before **End turn**.

TWO ACTION POINTS, THREE STATES

READY	AFTER A BLUE MOVE	AFTER FIRE
◆ ◆ 2 AP	→ ◆ ◇ 1 AP	→ ◇ ◇ 0 AP

COVER MUST FACE THE SHOT

HOSTILE COVER OPERATOR

Flanking changes the direction of attack.

After firing: both AP diamonds are empty.

R Reload: 1 AP

G Overwatch: ends turn

Seal both valves

The valves appear as Array A and Array B in Mission directives.

1 Secure A and B

Move adjacent and use **Interact (I)**. Each seal reduces noise and flood damage.

Array A becomes SECURED.

2 Let RELAY do the work

Remote link (V): 1 AP, within 4 tiles, with line of sight. Protect the Engineer.

RELAY links Array A from **3 tiles away** in this example.

Both secured? Start withdrawing together; keep support near injured operators.

CHECK THESE BEFORE END TURN

Noise

Shots add **3**. At **7**, another hostile surfaces during the hostile phase.

Striped tiles

Flood damage strikes every **third hostile phase**. Move off striped tiles before a surge.

Objective complete > return to the landing zone.

Bring everyone home

Complete the objective, then extract each operator individually.

1 Reach the green zone

Reserve **1 AP** for **Extract (X)**. A gold dash leaves no AP to extract.

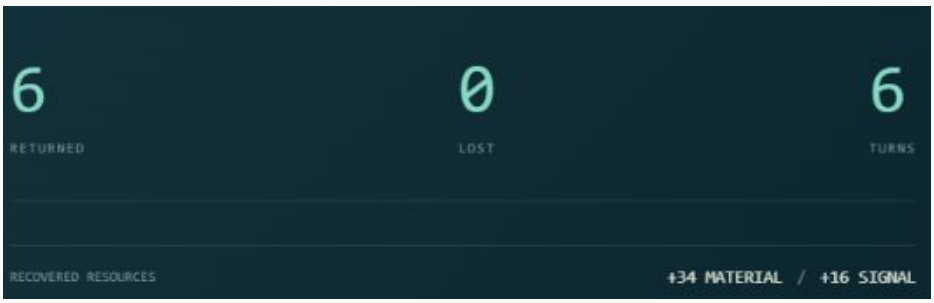

2 Count the whole squad

Here, **5 / 6** are aboard. PATCH still needs to extract. Aim to return all six.

3 Leave before turn 17

Anyone left behind at the deadline or when abandoning the mission is lost.

YOUR FIRST DEBRIEF

Example result: 6 returned, 0 lost. Combat outcomes vary.

Click for each operator.

Success needs the objective and **at least one return**. That can still include permanent losses.

BACK AT COMMAND

NORTH ATLANTIC

2 → 0

Breach reduced

ACOUSTIC MASKING

2 → 1

Cycles remaining

INDIAN OCEAN FLAG

3 → 2

Cycles to counter threat

Review injuries in Personnel; check worsening breaches before the next deployment.
